

PRESS RELEASE

Brinno introduces professional construction time-lapse bundle

Amsterdam, March 2, 2016

Construction cam bundle for time lapse to the next level

Following on the success of the BCC100 construction cam bundle, Brinno is introducing a professional bundle for the same application. This bundle consists of the acclaimed, high end TLC200 Pro time-lapse camera, waterproof housing and high end, aeronautics grade clamp solution in one appealing package. The BCC200 will be offered in dedicated construction retail, selected DIY stores and online retailers across Europe.

The Brinno BCC200 Pro HDR Time Lapse Video Construction Camera is the effortless way to record any construction project for contractors, architects, project developers, realtors and many more. Be it commercial, residential, new build, remodelling or additions. Add batteries and SD card, set it and forget it. Capture a time lapse video at the interval you want and play it back at the speed you want when the project is done. This provides a ready-to-go project documentation as well as a permanent security picture acquisition with a practically zero installation and maintenance cost.

Product highlights:

- The TLC200 Pro captures and converts thousands of photos into a time lapse video.
- With a capture every 10 minutes, using the timer feature, four AA batteries will last 80 days.
- High performance HDR video sensor, capture time lapse video in any light!

- Records any project indoors, or outdoors with the included waterproof housing.
- 112° wide angle field of view.
- Mount the camera anywhere on the aerospace-grade aluminium holder.

The BCC200 bundle is available starting immediately.
